

- ▶ Did you know that for every litre of Diesel your engine uses it emits 2.65kg of CO₂ into the atmosphere.
“Sail more, Motor less”
- ▶ Did you know that ocean going seabirds are the most threatened class of birds on the planet due to overfishing worldwide?
- ▶ Did you know that Ocean seagrass beds sequester more carbon than terrestrial forests?
- ▶ Did you know that nanoplastic pollution – more toxic than microplastics – have been found in both the Arctic and Antarctic?
- ▶ Did you know that two-stroke engines have 6.5 times more emissions than four-stroke?
- ▶ One pint (2 cups / 500 ml) of oil released into the water can spread into a one-acre oil slick, larger than a U.S. football field (U.S. EPA).
- ▶ If Americans replaced 10% of their meat consumption with oysters, the greenhouse gas savings would be the equivalent of keeping nearly 11 million cars off of the road.
- ▶ Discharge from a single boat over one weekend contributes the same amount of bacterial pollution as the treated sewage from 10,000 people!
